## PROFILE SUMMARY

Systems Engineer with 6+ years of experience, dedicated to delivering high-quality software solutions. Currently seeking new opportunities, I am passionate about learning and applying emerging technologies as well as modern project development techniques. Committed to continuous improvement, I thrive in dynamic environments where innovation and problem-solving are key to driving success.

## EDUCATION

(2013 – 2018) Computer System Engineer, Security and Web Development. Instituto Tecnológico de La Paz BCS.

## WORK EXPERIENCE

### True Insurtech Solutions - Software developer engineer

(Apr 2022 - Oct 2024)

- Developed, and optimized enterprise applications for insurance companies.
- Contributed to Agile workflows, including sprint planning, daily standup, and retrospectives.
- Deployed, monitored, and managed cloud-based solutions using Azure.
- Improved database operations and query efficiency using SQL Server to enhance critical reporting and the correct functionality of the system.
- Reviewed team pull requests to ensure clean, maintainable code and best practices.

### Intercam banco - Android developer

(Oct 2021 - Apr 2022)

- Developed and optimized mobile applications.
- Developed and implemented encryption algorithms for secure information exchange between the client and server in the mobile banking application.
- Spearheaded the initial stages of development for a next-generation mobile banking platform.

### Malmur - Full stack developer

(Oct 2019 - Sep 2021)

- Implemented micro-services to enhance scalability and response time in enterprise applications for the airline industry.
- Optimized application performance for improved efficiency and responsiveness.
- Contributed to all stages of developing a sports social media platform, from design to deployment.

## PROJECTS

- **Grúas La Paz: (Full Stack mobile developer)** - I developed an Android mobile application and its backend for inventory management and crane service administration.
- **Promociones Pacifico: (Full Stack mobile developer)** - I Developed a mobile application for managing sales, inventory, payments and customer relationships for the company.
- **El Chicho Jr: (Full stack developer)** - I Developed all stages of a web application for inventory management and sales tracking for the car retail company.
